

Task 1: Group: Forest Gump

- We have installed Chocolatey via Windows PowerShell using the command:
`Set-ExecutionPolicy Bypass -Scope Process -Force; iex ((New-Object System.Net.WebClient).DownloadString('https://chocolatey.org/install.ps1'))`
- Since we are using Windows we have used Chocolatey to install putty using the command:

```
C:\> choco install putty.install
```

- After installing we can use putty to log in to Euler by entering the Host Name: "euler.wacc.wisc.edu"

- When logging into Euler you have to change your password first. Then you will get to the head node, see task2.
